Agile Model
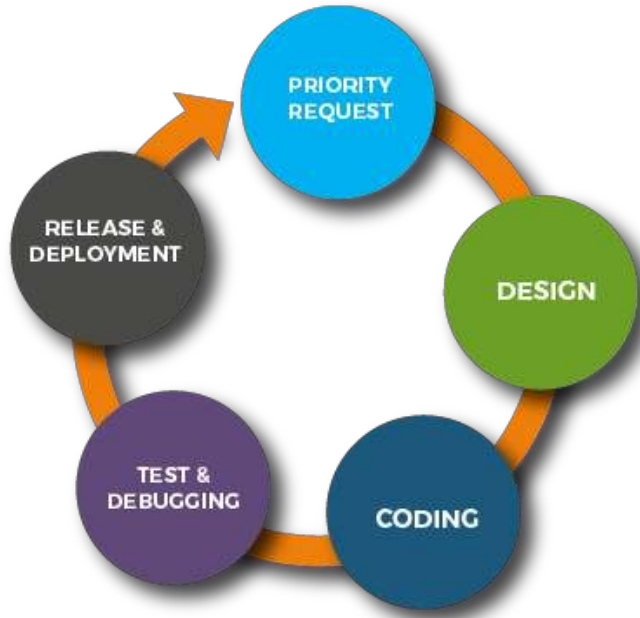

Agile Model

⭐ To overcome the challenges faced in Waterfall Model,we came up with th Agile Methodology

⭐ Agile Method believes in creating development lifecycles

⭐ Shorter Development Lifecycles are achieved by not releasing all th at once by following an incremen of development

Advantages of Agile Model

- ✅ Customer Satisfaction is high
- ✅ Less Planning Required
- ✅ Requirements can be dynamic in nature
- ✅ Functionality can be created and tested q

Disadvantages of Agile Model

❌ Not suitable for handling complex dependencies in projects

❌ Knowledge transfer to colleagues can be difficult since there is little documentation

❌ Success of the project depends heavily on customer interaction
